PROFESSIONAL PROFILE

I specialize in creating custom CMS/CRM functionality, optimizing SEO, and leading front-end development for enterprise-level applications.

My track record includes consistently delivering improvements in website performance, security, and process automation.

I prioritize code quality and security in all my work. I'm passionate about mentoring teams, planning robust architectures, and integrating cutting-edge technologies.

CORE SKILLS

Front-End: Next.js, React, Redux, TypeScript, Sass, Webpack

Back-End: PHP, Node.js, Express.js, Python, MySQL, MongoDB

Laravel/WordPress: custom plugins, themes, and API development

DevOps: Gitlab CI/CD, Docker, Kubernetes, Nginx, Apache

Testing: JEST, RNTL, Storybook

Languages: English – C1, Ukrainian – Native

WORK EXPERIENCE

Full-Stack Developer

The WhyKingz

Dec 2023 – Oct 2024

- Designed and deployed a custom plugin for enhanced internal linking, featuring CSV import/export and admin panel controls, boosting SEO across 5 major websites.
- Led the development of a content security plugin to prevent unauthorized copying and ensure the protection of leading websites' content.
- Automated complex solutions through content parsing, processing 100,000+ HTML files accurately within seconds.
- Developed a solution for filtering crawlers based on IPv6 address table data.
- Successfully managed a critical Telegram bot project.
- Onboarded developers and planned the architecture for future projects.
- Consistently demonstrated initiative in work processes and website improvements.
- Educated colleagues through writing articles and delivering presentations; shared automation techniques with the team to improve overall efficiency.
- Increased performance for websites by 20–30%, enhancing user experience.
- Continuously improved skills in server management and project security.

WORK EXPERIENCE

React Developer

Onix-Systems

Jul 2023 – Dec 2023

- Led the front-end development for an ERP system, impacting 400+ colleagues.
- Initiated the refactoring of a legacy code base to implement more reliable applications state management using cutting-edge technologies.
- Ensured code quality with JEST and RNTL unit tests and documented using Storybook.
- Integrated i18n translations for React components.

WordPress Developer

Onix-Systems

Oct 2022 – Jul 2023

- Successfully managed development and client communication for an eCommerce site, achieving high customer satisfaction.
- Boosted page load speed by 22% for a major blog website.
- Introduced the implementation of AI tools to enhance developer productivity and experience.
- Contributed to the development and release of an internal company plugin.
- Led a site redesign swiftly due to a tight deadline, showcasing adaptability.
- Conducted bug fixes and ensured site security.
- Optimized for SEO and implemented multilingual translations.

WordPress Developer

Freelance

Jul 2021 – Feb 2022

- Developed and maintained business websites.
- Designed responsive layouts for mobile and desktop.
- Constructed a kitchen design application for customizable interiors.
